

## DSP

DSP Data and System Planning, founded in 1986 is NAVIS implementation partner since 2007 with a certified team of 6 engineers coming from operational experience in container terminals.

DSP provides IT solutions and business operation consultancy to shipping and terminal industry.

DSP is specialized in TOS implementation covering project management, system integration, training, go live and post go live assistance.

## NAVIS

Navis, a part of Cargotec Corporation, is the global technology standard for managing the movement of cargo through terminals, standing the test of time. Navis combines industry best practices with innovative technology and world-class services to enable its customers to maximize performances and reduce risks.

# Hands on Navis PRIME ROUTE

## 3 Day Workshop

### Presentation

Prime Route is one of the most powerful advanced module of Navis SPARCS. It allows optimal, real-time routing, dispatching and monitoring of pools of SCs and terminal tractors.

This workshop will show you all product features and opportunities to maximise terminal productivity, minimising waiting time, dispatching human errors and equipment hourly costs. Learning how to set Prime Route and the relation among the parameters through the practical exercise, we will give you the key elements to support management to take the right decisions.

### Agenda

- DAY ONE: Theory  
*Prime Route features and general principles - Prime Route parameters – relation with expert decking – yard path model*
- DAY TWO: Implementation  
*Implementation Plan and best practice  
Review of operational use cases*
- DAY THREE: Practice  
*Understanding your operation  
and set up of strategies for your future tests*

### SUBJECT:

NAVIS PRIME ROUTE FOR TERMINAL TRACTORS

NAVIS PRIME ROUTE FOR STRADDLE CARRIERS

DURATION: 24 hours

NUMBER OF PARTICIPANTS: No limit

LOCATION: At your terminal

AVAILABLE LANGUAGES:

English, French, Arabic, Italian, German

WORLDWIDE AVAILABLE

### WHO SHOULD ATTEND?

- Terminals working or willing to work with Prime Route that would like to
  - learn how to do a parameters fine tuning,
  - train their staff as expert users
  - review and check current process to take the maximum ROI from Prime Route .
- Terminals, Port Authorities looking for new TOS that are interested to learn more about NAVIS advanced solution.

### PRE REQUISITE

- Terminal Operations process knowledge
- SPARCS/XPS knowledge
